SUMMARY

Senior developer at the Government Digital Service and former CTO, with extensive experience across full-stack web and mobile development. Committed to fostering collaboration, building cohesive teams and taking a solution-focused approach to hard problems. A polyglot who picks the right tool for the job rather than a fixed stack.

RELEVANT EXPERIENCE

Senior Developer @ Government Digital Service (GDS)

Jan 2024 - Present // London, UK

- Building and maintaining cross-government digital services, including GOV.UK One Login

Senior Software Engineer | CTO @ Vidor

Jun 2021 - Dec 2023 // Delaware, USA

- Successfully architected, implemented, and shipped highly interactive customer-facing web and mobile applications
- Developed and maintained robust and scalable backend systems for a high-traffic e-commerce platform, utilizing technologies such as JavaScript, Amplify, AWS AppSync, Serverless, and DynamoDB
- Designed, developed, and implemented a RESTful API using Node.js and AWS Lambda, facilitating seamless communication between the mobile app and backend services
- Analyzed and conducted regular code refactoring and performance optimizations, resulting in a 30% reduction in app loading times and enhanced overall app responsiveness
- Managed a team of software engineers, facilitating agile methodologies for project success
- Migrated infrastructure to the cloud, improving scalability and reducing costs by 20%

Senior Software Engineer | CTO @ XOXI

Apr 2021 - Dec 2023 // London, UK

- Led the development and implementation of a technology roadmap aligned with the company's long-term goals
- Collaborated with cross-functional teams to optimize business processes and improve operational efficiency

Lead, Software Engineer @ Farmsby

Jul 2020 - Dec 2021 // Lagos, Nigeria

- Migrated a legacy backend service from PHP to a modern stack using JavaScript (Node.js), PostgreSQL, and Python, resulting in a 40% improvement in response times
- Collaborated with five engineers to refactor and rewrite critical components, ensuring a smooth transition without disrupting service availability
- Engineered and maintained major features of Farmsby's customer-facing web app using ES6, React Native, Backbone.js, Marionette, and CSS

Head, Information Technology @ ITSync Synergy

Apr 2016 - Feb 2021 // Lagos, Nigeria

- Developed on-demand web, mobile, and device software for sectors including banking, oil and gas, and medicine
- Set up and implemented business management solutions for startups, NGOs, and multinationals
- Built and scaled business systems and servers, including enterprise-grade services
- Implemented agile methodologies to improve project delivery and collaboration between cross-functional teams

Software Engineer @ Silicon South Technologies

Jan 2015 - Mar 2016 // Port Harcourt, Nigeria

- Worked with various languages, frameworks, and content management systems such as JavaScript, WordPress, Drupal, Joomla, and Magento

SKILLS

Engineering leadership – led teams as CTO; agile delivery with cross-functional teams

Architecture & cloud – web and mobile apps, backend systems and cloud migration

Approach – polyglot: the right tool for each job

Programming Languages

TypeScript, JavaScript, Python, Java, Kotlin, SQL, Ruby, GraphQL, HTML, CSS/Sass, PHP

Libraries & Frameworks

React, Next.js, Node.js, Express, React Native, Ruby on Rails, Django, Flask, Vue.js, Redux, GOV.UK Design System, Jest, Playwright, Cypress

Tools & Platforms

Amazon Web Services (AWS): Lambda, ECS Fargate, EC2, DynamoDB, AppSync, Serverless; AWS CDK, Terraform, Docker, Kubernetes, GitHub Actions, CI/CD, PostgreSQL, Git, webpack

Practices: TDD, Microservices, Event-driven architecture, Infrastructure as Code, OpenID Connect (OIDC), OAuth 2.0, JWT, OWASP Top 10, WCAG 2.2 AA accessibility, Mentoring, Technical leadership, LLM integration, AI-assisted development

EDUCATION

Federal University of Technology, Owerri

2010 - 2016 // Imo, Nigeria

BSc Chemistry

COMMUNITY PROJECTS

Keeping it Real Foundation (KIR)

2015 - 2018 // Rivers, Nigeria

Trained people with disabilities, including deaf and mute people, in tech skills, from computer basics to programming.

INTERESTS

Fitness, music, travelling, reading, hiking.
